Welcome!

If you are reading this, it's clear that water purity matters to you as much as it does to us — and we love that!

Every year, we proudly publish this water quality report on our website because we believe our customers deserve to know exactly what they're drinking. We're confident that DrinkMore Water is among the purest bottled waters in the world, and this report lets you see the proof for yourself.

Our FDA licensed facility is inspected on an ongoing basis by the Maryland Department of Health and we maintain the highest standards of quality in bottled water. We continuously test our water throughout the day, every day. We send samples daily to an independent third-party laboratory to test our water. On top of all that, we send another sample to another independent third party to test our product for any impurities. Those results are listed in this document.

You will see in this report that DrinkMore Water is able to remove 99.5% of all impurities found in water. Our water is one of the purest waters on the planet - we hope you taste the "nothing" in every sip.

We hope to serve you soon.

President

Certificate of Compliance

This is to certify that

EDGE ANALYTICAL, Inc.,

An Accredited Drinking Water Laboratory,
Certification number 046, has completed the analysis of

DRINKMORE WATER/DRINKMORE DELIVERY INC

"Purified Water"

on December 13, 2024, according to the FDA testing requirements for bottled drinking water.
All parameters were found to be in compliance with 21 CFR 165 and 21 CFR 129
published limits for bottled drinking water.

Notes:

ND = Not detected above the listed practical quantitation limit (PQL) or not above the Method Detection Limit (MDL), if requested.
PQL = Practical Quantitation Limit is the lowest level that can be achieved within specified limits of precision and accuracy during routine laboratory operating conditions.
D.F. - Dilution Factor

RE: 25-02992 - 50 State Product RS THM

Dear Sarah Kinnunen,

Your project: 50 State Product RS THM, was received on Thursday January 30, 2025.

All samples were analyzed within the accepted holding times and were appropriately preserved and analyzed according to approved analytical protocols, unless noted in the data or QC reports. The quality control data was within laboratory acceptance limits, unless specified in the data or QC reports.

If you have questions phone us at 800 755-9295.

Respectfully

Lawrence J Henderson, PhD
Director of Laboratories, Vice President

NOTES:
If a compound is detected > or = to the State Reporting Level, SRL, specified increased monitoring frequencies may occur per DOH.
MCL (Maximum Contaminant Level) maximum permissible level of a contaminant in water established by EPA; Federal Action Levels are 0.015 mg/L for Lead and 1.3 mg/L for Copper. Sodium has a recommended limit of 20 mg/L. A blank MCL value indicates a level is not currently established.
Trigger Level: DOH Drinking Water Response level. Systems with compounds detected in excess of this level are required to take additional samples. Contact your regional DOH office.
ND (Not Detected): indicates that the parameter was not detected above the State Reporting Limit (SRL).

Lab - Indicates where parameter was analyzed. See header address for lab code.
